

# TRAFFIC CONTROL

## About the course

New to traffic control? This one-day course prepares you for work as a traffic controller and teaches you to set up traffic control equipment according to a traffic guidance scheme.

Learn to read and interpret traffic management plans, use appropriate signs and devices to control traffic, and identify and manage site safety.

Get the most current units of competency in:

### **RIIWHS205D Control traffic with stop-slow-bat.**

This unit meets Vic Roads requirements for work as a Traffic Controller.

### **RIIWHS302D Implement traffic management plans.**

This unit meets Vic Roads requirements for those responsible for setting out, implementing and/or monitoring a traffic guidance scheme.

TME also offer a ½ day refresher for experienced operators needing to keep their ticket up-to-date. Make sure you comply with Vic Roads requirements and undertake refresher training every three years.

## Program Outline

- ✓ Understand legislative requirements related to traffic control
- ✓ Control traffic using a stop slow bat
